

Certificate III in Music (Technical Production)

The Technical Production program gives you the opportunity to experience the industry in a fun and practical way. The program combines theory based work with practical assignments and projects throughout the year. You have the opportunity to experience the music industry in all its different elements. The program incorporates elements of performance, event management, back stage, promotion and management, lighting and rigging and sound recording. The facilities at Sandringham College provide you access to sound recording studios, rehearsal rooms, computers with industry standard software programs. Assessment for the year involves students designing their own fundraising musical event.
